SUMMARY

On March 22, 2026, the construction site at 1229 South State showed progress in various areas, including excavation and shoring of foundation walls, plumbing rough-in, and framing of exterior walls. The site appears to be in the early stages of foundation work and construction. Safety observations noted the presence of hard hats and safety vests in some areas, but also identified potential tripping hazards and incomplete cleanup. No major issues or delays were reported.

WORK COMPLETED

- Foundation: Excavation and shoring of foundation walls (in_progress)
- Plumbing: Plumbing rough-in for water supply and drainage (in_progress)
- Framing: Framing of exterior walls and interior partition walls (in_progress)

PROGRESS UPDATE

The construction site is in the early stages of foundation work and construction, with various tasks underway, including excavation, plumbing rough-in, and framing. The site appears to be progressing, but some areas require better housekeeping and attention to safety.

ISSUES / DELAYS

- Scattered debris and materials indicating a need for better housekeeping — Impact: Potential tripping hazards and safety concerns [low]

SAFETY NOTES

- Hard hats and safety vests worn by workers in some areas — Action required: None
- Potential tripping hazards from scattered debris and materials — Action required: Improve housekeeping and cleanup

NEXT STEPS

- Continue foundation work, including excavation and shoring (medium)
- Complete plumbing rough-in and start installing fixtures (medium)
- Finish framing and start installing exterior finishes (high)

RESOURCES

CREW

Team members on site included Mike S and Ben
